COTTON CHATS

DRAPER COMPANY, HOPEDALE, MASS.

COTTON CHATS

DRAPER COMPANY HOPEDALE MASS.

NO. 119. SEPTEMBER, 1912.

FORTY-THREE YEARS AGO

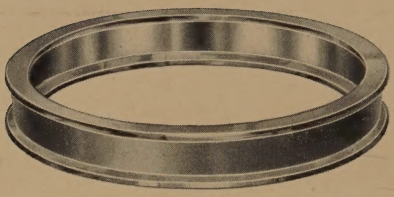
the original double flanged spinning ring patent was granted William T. Carroll. Double rings were introduced by our predecessors and rapidly replaced the single rings then used on spinning frames.

Since that time improvements have been made in details of manufacture whereby rings of better and more uniform quality are secured.

In 1907 we registered in the United States Patent Office the trade-mark MIRROR, and our double rings have since been sold under this trade-mark.

Our Mirror Spinning Rings with the prestige of forty-three years' experience in manufacture have established the standard for quality.

When ordering for either old or new frames, be sure and specify **Mirror rings.**



MIRROR SPINNING RINGS AS IN THE MIRRORS SEEN
